DETAILED ACTION

Allowable Subject Matter

Claims 1-13 and 30-49 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest an infrared imaging device where the first lens element is adapted to mimic a meniscus asphere correct for conjugates of infinity and for the focal length of the first lens element and where the second lens element acts as a field flattener (independent claim 1); an infrared imaging device having first and second plastic lens elements each having a first major surface that is convex and a second major Fresnel surface where the Fresnel surface has a series of grooves that are convex or aspheric in cross-section taken along a perpendicular to the second major surface of the lens element (independent claims 30, 37 and 47). For purposes of clarity, "convex" or "concave" is interpreted to be curved, since this is only what is originally disclosed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
